Full-Stack Developer with 5 years of experience building web applications with Next.js, TypeScript and PostgreSQL. Software Developer at Thermolinks (previously Frontend Developer) delivering internal management systems, remote contract software developer for Aisjeed Technologies, and independently designs and builds multi-tenant SaaS products for Nigerian businesses, owning everything from database schema and row-level security to authentication, payments, background jobs and deployment. Security-conscious, with hands-on penetration testing of tenant isolation and payment webhooks, and a Nigeria-first product approach: Paystack, Naira pricing and FIRS e-invoicing compliance.

AREA OF EXPERTISE

Next.js 15 (App Router) & React	TypeScript	PostgreSQL & Prisma ORM
Multi-Tenant SaaS Architecture	Authentication & Authorisation	Payments (Paystack)
Server Actions & REST APIs	Application Security Testing	Cloud Deployment (Vercel)

KEY ACHIEVEMENTS

- Designed a shared-schema multi-tenancy pattern using PostgreSQL Row-Level Security and a two-client Prisma setup (admin vs tenant-scoped), reused across multiple SaaS products.
- Building **Bilta**, an invoicing and business-document SaaS for Nigerian SMEs with FIRS e-invoicing compliance and a three-layer template engine.
- Penetration-tested own product for cross-tenant IDOR, unauthorised Server Action calls and Paystack webhook verification.
- Delivered the frontends of four internal management systems at Thermolinks: Contractor, Employee, Orphan and Safety Report systems.
- Runs a Value Added Services (VAS) aggregator business, bringing telco and business-operations insight to product work.

PROFESSIONAL EXPERIENCE

Independent - Full-Stack Developer & SaaS Builder

Ongoing

Abuja (Remote)

- Build multi-tenant SaaS on Next.js 15 App Router, TypeScript, Prisma and Neon PostgreSQL, with Auth.js v5, Upstash Redis/Qstash for caching and background jobs, Vercel Blob storage, Resend email and Sentry monitoring.
- Bilta** (active build): invoicing and document platform for Nigerian SMEs supporting multiple document types, FIRS e-invoicing compliance and Paystack billing.
- Contractor Pro Max** (in development): multi-tenant construction ERP for Nigerian contractors on the same RLS and two-client Prisma architecture.
- Integrate Paystack payments with verified webhooks and Nigeria-first defaults: Naira pricing, Verve card priority and +234 phone handling.
- Build and maintain client websites (zaksfoundation.org, acesnps.com.ng), handling hosting, DNS, SSL and mail delivery.

Thermolinks Concepts Limited - Software Developer / Engineer

Nov 2025 - Present

10 Onitsha Crescent, off Gimbiya Street, Area 11, Abuja

- Promoted from Frontend Developer in November 2025 into a broader software engineering role.

Thermolinks Concepts Limited – Frontend Developer

2022 – Nov 2025

10 Onitsha Crescent, off Gimbiya Street, Area 11, Abuja

- Developed the frontends of internal management systems with Next.js, TypeScript and Tailwind CSS, integrated with backend REST APIs.
- Built the **Contractor Management, Employee Management, Orphan Management** and **Safety Report** systems, covering onboarding, HR records, charitable data management, incident reporting and compliance tracking.
- Maintained code quality, component reusability and a consistent design system across all projects.

Aisjeed Technologies Limited – Software Developer (Contract)

Ongoing

Abuja (Remote)

- Remote contract software developer for an Abuja-based IT consulting firm, alongside full-time employment. Built and deployed the corporate website (aisjeed.ng) and maintain its hosting, DNS, SSL and email delivery.
- Author detailed product and technical specifications, including a geofenced biometric attendance PWA, an HR SaaS aligned with the Nigeria Tax Act 2025, and a real-estate marketplace.

Thermolinks Concepts Limited – Frontend Intern

2021 – 2022

Area 11, Abuja

- Progressed from fundamental scripting to component-based architecture while mastering core modern web technologies.
- Built and deployed responsive interfaces with HTML5, CSS3, Flexbox and Grid for seamless cross-device compatibility.
- Developed a React weather dashboard consuming a third-party REST API, alongside a to-do application and a blog website.

FCTA Abuja – SIWES Industrial Trainee

2019 – 2020

Area 3, Garki, Abuja

- Organised and analysed datasets in Microsoft Excel using formulas and functions to streamline reporting.
- Authored technical documentation, weekly progress reports and presentations for team leads.

EDUCATION

Bachelor of Science (B.Sc.) Computer Science – Second Class Upper

University of Abuja, Abuja, Nigeria.

Frontend Development

Northwestern University (Coursera)

Introduction to Cybersecurity & Endpoint Security

Cisco Networking Academy

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3

Backend: Node.js, Next.js Server Actions & Route Handlers, Prisma ORM, REST APIs

Data: PostgreSQL (Neon, Row-Level Security), Redis (Upstash)

Auth, Payments & Services: Auth.js v5, Paystack, QStash, Resend, Vercel Blob, Sentry

Tooling & Hosting: Git & GitHub, Vercel, VS Code, Claude Code, WordPress, DirectAdmin

Design: Figma (design tokens, prototyping)

PROFESSIONAL STRENGTHS

System Design

Security Mindset

Problem Solving

Product Thinking

Communication

Self-Directed Delivery
